

Core Revolutionizes 988 and Crisis Care Services Increasing Efficiency and Effectiveness

Improve care integration to guarantee that individuals served receive the right level of care through a comprehensive system that seamlessly coordinates services across the crisis continuum.

Through use of advanced technology (Cx360) you can manage clients in crisis through your Command Center. Automated workflows ensure that all services are provided within expected timeframes and service providers are alerted to critical next steps. Nothing is overlooked and clients move more quickly to the appropriate level of care which supports de-escalation and recovery.

988 Requires a System of Care Approach

Tools for Better Triage and Hand-Offs

Eliminate delays in access to services with intuitive technology for real-time response

Real-Time Care Coordination

- Access client schedules, assessments, treatment plans, and progress notes to monitor and track outcomes
- Utilize role-based access protocols to restrict access to only those clients to whom the user is assigned

Centralized Outpatient Appointment Scheduling

- Make client referrals and warm handoffs to services and organizations with a single, easy-to-use interface
- Confirm whether appointments were made and kept with closed-loop referral process monitoring

Transportation Scheduling & Tracking

- Instantly determine what and when transportation options are available
- Schedule new appointments to keep clients moving through your system of care

Communication & Messaging

- Communicate with mobile crisis teams and care teams through a simple unified messaging system
- Easily share documents such as consents and assessments across the care team in one central location

Real-Time Regional Bed Registry System

- Quickly identify what beds are available at which provider location(s) across the system
- Direct crisis mobile team efforts to get clients to the right place quickly

Performance Dashboards

- Seamlessly track crisis management data, including time from call to initial contact, use of law enforcement, diversions from unnecessary higher levels of care, etc., to manage your crisis service
- Generate reports to support the “air traffic control-type functioning” at the heart of 988 and crisis system success

Embedded Telehealth

- Conveniently provide remote care with a solution built for behavioral health
- Ensure the speedy execution of real-time handoffs

Modernize Your Approach to Empower Better Care with Cx360 – Your Complete EHR Solution for Behavioral Health and Crisis Services

Core's EHR solutions for complex care communities have been trusted by executives, program directors, and end-users alike for over twenty years.
